Enterprise
Solutions

Why MIM?

MIM provides integral solutions that organize and improve department workflows for centers with diverse software and equipment. Through constant innovation, MIM continues to develop technologies that exceed the expectations of large institutions.

- **Flexibility** - By supporting virtually all OEM vendors and third-party systems, MIM is the solution that fits in every environment
- **Reading** - Review automatically linked images from multiple vendors simultaneously
- **Fusion** - Fuse any combination of images from any vendor including CT, MR, PET, SPECT, US, XA and most 2D images
- **Storage** - Expandable storage to accommodate both DICOM and non-DICOM objects such as PDF, JPG, XLS, and more
- **Integration** - MIM supports integrations with many major vendors, and our API framework is simple to implement for your RIS, EMR, PACS, etc., to further optimize workflow and accessibility

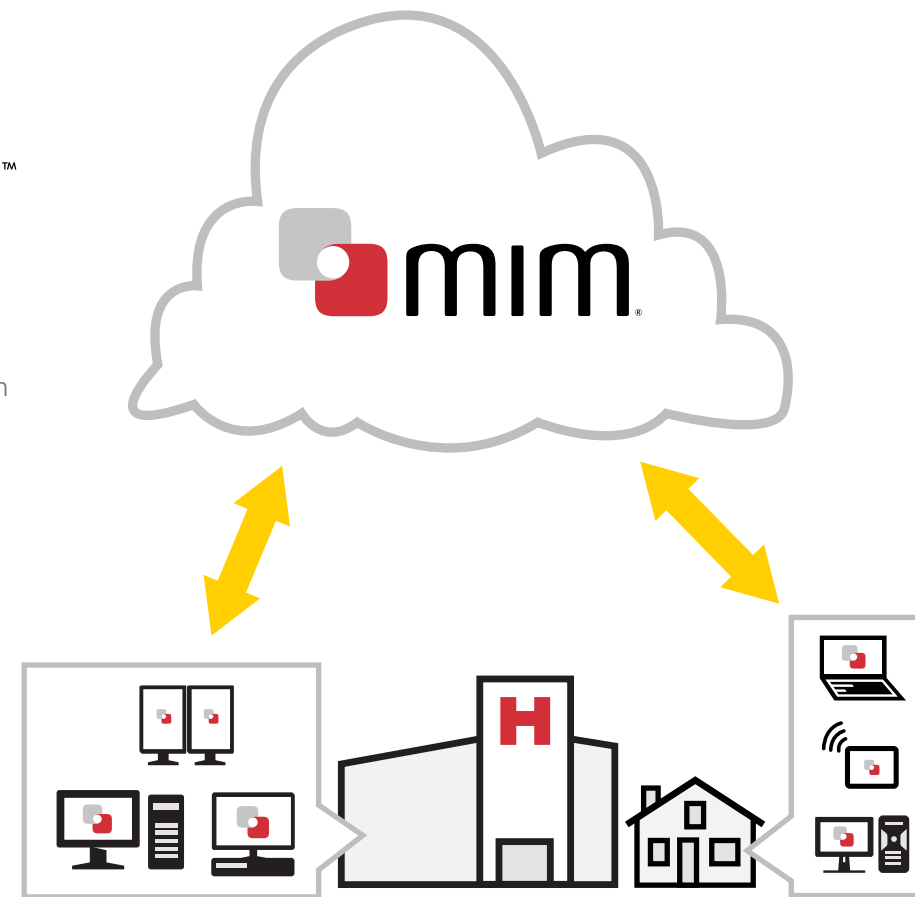

Vendor Neutral: MIM integrates with virtually all OEM vendors and third-party systems.

mim Zero Footprint™

Access MIM Anywhere and Everywhere.

- No local application servers
- Access on any device with a web browser
- Delivered via encrypted HTML5 virtualization
- Automated mirroring - local database and cloud database are synced
- Allows for transparent user experience regardless of access point

mim Assistant™

The Engine of Automation.

Clinical Workflow Management

- Automatically process incoming patient data through a rule-based environment
- Automatically run MIM Workflows™
- Auto-contour CT's and save the structures to the patient list
- Automatically fuse images before you arrive at your workstation to review
- Auto-generate plan reports in Plan Review™

Data Management

- Auto-sync and compress data to MIMcloud™ for quick access
- Auto-query diagnostic images
- Auto-route studies and automate fetching protocols

User Management

- Customize preferences, workflows, and privileges for all users
- LDAP/AD integration allows for the use of existing permissions, profiles, and login credentials
- Task-list functionality allows for assigning studies or statuses to coordinate the planning process

Batch Processing

- Large populations of patient data can be processed using custom workflows
- Most functions in MIM can be automated, so extracting information, organizing, and feeding reports or spreadsheets is quick, reducing errors on large projects

mim Workflows

The Framework of Automation.

- Automate complex or time-consuming tasks like contouring, TV expansions, and deformable image registration
- Create flexible hanging protocols for more efficient reading including serial study review, HN & WB, and WB with Legs with automated linking
- Customization for full control of automated processes
- Drag-and-drop workflow design interface – no coding involved

Session Save

Preserve Your Work and Instantly Resume Where You Left Off.

- Organizes and expedites patient management by allowing clinicians to preserve complex processes for later review
- Easily access patient data for tumor board/chart rounds
- Hand off a nuclear medicine case from a technologist to a physician, exactly as it was prepared

A Clinical System that
Excels at Research.

Native support for MATLAB® and Java®

- Write your own code and utilize it within MIM
- Leverage MIM Extensions™ and MIM Assistant for batch processing

Expedite Research

- MIM's intuitive interface lets you focus on your specific project and avoid redundant tasks such as building a UI, library, or tools

Translational Research

- Immediately apply lab developments in the clinic

User Preference Management and Security

- User access auditing
- Permission based access to PHI
- Easy management for administrators for both preferences and security settings

Support

A Customer-centric Approach.

- Clinical Support Engineers directly available via the web or by phone for immediate consultation
- Dedicated Support Manager assigned to your site responsible for ongoing training and routine follow-up
- Customer feedback is highly-valued and documented to continually improve our product
- Pager system for quick call-backs on nights and weekends
